AUTONOMY FOR CUBA

EXACTLY WHAT IS NOW PROPOSED BY SPAIN.

WASHINGTON, October 27 .- The Spanish Minister, Senor Dupuy de Lome, consented for the first time to-day to speak concerning the policy of autonomy which the Spanish Government proposes to apply to Cuba. This has been referred to in general terms since the advent of the Sagasta ministry, but there has been lack of authentic details. Before leaving for New York to-day, where the Minister and his family will spend several weeks, Senor Dupuy de Lome gave the evolutions through which autonomy has passed, leading up to the present policy, and a general outline of

Under the provisions of the treaty, concluded in 1878, at the close of the last Cuban disturbance, it was provided that Cuba was to enjoy the same liberties as those accorded to the Island of Puerto Rico. This latter island had the same liberties as those of any province of Spain. This brought the Autonomist party, so-called, into existence, its essential principle being that of self-government for Cuba, and not treating Cuba as a province of Spain, as was the system in Puerto Rico. That party adopted a platform, and in 1886 offered a complete programme of autonomy for the consideration of the country. A peaceful agita-tion of this autonomy programme was then inaugurated.

In 1803, for the first time, a Minister in a Liberal Cabinet, Senor Maura, saw the mistake of that system of rule known as "assimilation," which treated Cuba as a Spanish province, and he presented a plan of reform. This was strongly opposed, and after two years of discussion it was found impossible to put the plan through the Cortes. Then a compromise reform measure was framed, which looked to the personality of Cuba as a separate body, but under the Spanish flag. CANOVAS'S IDEA.

These reforms having been considered insufficient, on account of the state of the island, Premier Canovas proceeded to greatly enlarge them, his plan being, short of absolute autonomy Now Mr. Moret, Minister for the Colonies in the new Cabinet, fulfils the prorise of the Liberal party when it was is the minority, and proclaims that automany as it had always been demanded by the home rule party of Cuba y the home rule party of Cuba. They claim that the General is always a Democrat, and that he has ever been a devoted and active supporter of all the Democratic platforms, both State and national, since he has been in political life.

NEW YORK CENTRAL WRECK. Depew's Opinion That It Was Caused

by Dynamite. COLD SPRING, N. Y., October 27 .-President Depew's opinion that the disaster of Monday morning on the New York Central railway was the result of a dynamite explosion, planned by ene-mies of the corporation, finds many up-holders among railway officials and citi-zens familiar with the conditions. "If the embankment of the railway was

"If the embankment of the railway was torn up by dynamite, the motive of those who did it was not robbery, but revenge," was the statement made by one official of the road to-day. "A rigorous investigation is being made, and at least one man may be arrested to-day."

When the party of twenty-six roadmasters of the New York Central system arrived at the scene early Monday morning, and commenced a critical survey of

ing, and commenced a critical survey of the section of the embankment which had been either washed or blown out, one of the roadmasters, a man who has had great experience in the use of dynasaid that the excavation looked to him very much like the work of dyna-mite. The tendency of dynamite is to blast downward, rather than upward or outward, and one of the expert track builders of the railroad says that a very light charge of dynamite would have col-

lapsed a section of track fully as ex-tensive as the section in question.

The locomotive was found in the river at least thirty feet south of the depres-sion in the track, which makes it seem rasonably certain that the engine leaped the space before it started in its plunge into the muddy bottom of the river. It is known that the engineer had shut off his steam and applied the air-brakes to the train before the crash came, and train before the crash came, and these conditions lead the officials to be-lieve that Engineer Foyle saw that some-thing was wrong with the track in time to apply the brakes before he went into the river with his engine. Still, it

applied the brakes the moment he felt

nis engine sinking. General-Manager Toucey, of the New General-Manager Toucey, of the New York Central, believes that the disaster was caused by a break in the engine's machinery. Mr. Toucey said to-day:

"I believe something broke on the engine, and ploughed up the ground and jarred the roadbed so that it loosened the embankment. The sudden stoppage of the train caused the cars to double up on each other, and helped to loosen the roadbed. That is what I believe caused the accident. That is the conclusion I reached from my investigation of the facts. If there had been a dynamite explosion before the train reached that place, the engine could not have passed over it and come seventy-five feet this side, as it did."

On Monday, however, the Duchess be-came ill, though even then no serious symptoms were observed. But on Tues-day she became worse, and the Londor day she became worse, and the London specialists, who had previously operated on her, were summoned to Richmond. They held a consultation, and decided last evening that the life of her Royal Highness could not be sustained without another operation. This was successfully performed, but the Duchess gradually sank, and died at 3 o'clock this morning. The Duke of Teck is prostrated at the death of his wife.

The Duchess of York was the only member of the family present at the death of the Duchess, as until late last night fatal consequences were not expected. When the condition of her Royal Highness seemed more serious her rela-tives were hastily summoned, and they

CLAIMS FOR TRACY. How It Is Figured Out That He Will Be Elected.

NEW YORK, October 27.-Following long caucus of Republican district leaders to-day, President Quigg, of the Republican Committee, gave out the following statement:

"The Republican organization has care fully canvassed the vote in every election district of every borough in the new city. Several Assembly districts have been canvassed twice, and some have been canvassed three times. Each of these repeated canvasses show that Tracy's strength is growing, and that Low's sup-port, which has never been large, bestrength is growing, and that Lows sup-port, which has never been large, be-comes smaller every day. There are only two Assembly districts in New York city in which Mr. Low will have any substantial Republican support. The net effect of Mr. Low's candidacy will be to increase the majorities of the Republican party over Van Wyck. Low's vote be smaller than Van district. We shall carry New York for Tracy by just about the plurality over Van Wyck which was obtained by Govdistrict. ernor Black last year over Porter.

"In Brooklyr the situation is similar to the situation in New York, though the to the situation in New York, though the proportion of Democrats to Republicans in Low's following will naturally be smaller than it is here. There the proportion will be about half and half. The portion will be tracy over Van Wyck will be greater in Brooklyn than in New York, and is likely to reach 40,000.

"Low's vote will leave the two great parties, as to comparative strength, in just about their normal condition, but just about their normal condition, but George's vote will so reduce Van Wyck's as to give us for Tracy a first-rate plu-rality. On the conditions as they exist, Low might have in Brooklyn as many as 30,000, or, to be liberal, 35,000 votes. But his Republican support is falling away from him. There are thousands of Republicans who have been misled by the New York Tribune. and the New York Mail and Express into the idea that Low has some chance of cleans. Low has some chance of election. They are finding out that this idea is preposterous, and that it is being circulated by these newspapers maliciously and dishon-

SENSATION IN HUNGARY. Suggestion of Absolutist Govern-

BUDAPEST, October 27 .- In the lower house of the Hungarian parliament today, Baron Banffy, the Premier, replying to Herr Francis Kossuth, son of the celebrated Hungarian patriot who urged the government to "take advantage of Austria's choas, and try for Hungary's independence," declared that the ministry had no intention of turning Austria's difficulties to the advantage of the Hun-

garians "The union of the two countries," he declared, "must be regarded as indissoluble. Should the Austrian constitutional system break down, which God forbid, the Hungarian Government would be obliged to act independently regarding the joint questions of the customs and commercial treaty between Austria and Hungary, and the charter provisions of the Austro-Hungarian banks.

This announcement caused a great sen-sation, as it is believed that Baron Banffy spoke with the consent of the Emperor-King, and that his statement points to the possibility of Absolutist government in Austria.
